

The Access to Insurance Initiative (A2ii) is a unique global partnership working to inspire and support insurance supervisors to promote inclusive and responsible insurance. As the implementation arm of the International Association of Insurance Supervisors (IAIS), we identify supervisory needs, develop tailored capacity building programmes, translate knowledge gained from the regions into global learning tools, contribute to the IAIS standard setting activities and support the development and implementation of sound regulatory frameworks. Our ultimate aim is to advance insurance markets globally and reduce the vulnerability of low-income populations against risk.

01

The importance of insurance

In many parts of the world, people and businesses live and operate without the security of insurance. However, when loss strikes, it does not discriminate between the rich and poor. In the event of a shock, past development efforts may be reversed and the near-poor may fall (back) into poverty. Even those in a relatively secure position may find themselves dragged into financial hardship. Insurance protects against unforeseen losses and financial vulnerability. In areas such as agriculture, innovative insurance products can provide solutions to deal with the impact of climate change and catastrophic events. In this way, insurance can also reduce the likelihood of food and economic crises.

02

The power of insurance regulation

Too often, insurance providers may not see a compelling business opportunity to offer products to the low-income population, and individuals or companies do not fully understand the benefits.

"A robust supervisory framework creates incentives for industry involvement and helps build consumer confidence through effective policyholder protection, particularly for low-income households."

Peter Braumüller, Chair of the Governing Council A2ii

Supervisors play a vital role in overcoming these barriers and in encouraging private and public stakeholders to work together to enhance access to insurance for all. However, this requires specific skills that many supervisory authorities in developing countries lack.

03

Our solutions

The Access to Insurance Initiative (A2ii) is a unique global partnership with the mission to inspire and support supervisors to promote inclusive and responsible insurance, thereby reducing vulnerability.

"We strengthen the capacity of supervisors seeking to advance inclusive insurance markets, particularly for low-income clients, by promoting sound, effective and proportionate regulation and supervision based on globally accepted insurance standards."

Hannah Grant, Head of Secretariat, A2ii

The core fields covered by the A2ii are knowledge generation and dissemination, dialogue and learning, inputs for the development of global standards and guidance, support for country implementation processes in the area of regulatory and supervisory reform, support for regional implementation and capacity development of insurance supervisors.

"The A2ii is a key strategic partner of the IAIS. In working towards the goal of effective and globally consistent supervision of the insurance industry, the A2ii's implementation and capacity building support to emerging market supervisors is most valuable to the process."

Jonathan Dixon, Secretary General IAIS

04

How A2ii works: partnerships

We are the key implementation partner of the global standard setting body for insurance supervision, the International Association of Insurance Supervisors (IAIS), on access to insurance. The IAIS determines the necessary standards and structures for a strong industry. We listen to and work closely with insurance supervisors and provide guidance on how to implement those standards. A2ii's close relationship with insurance supervisors and the IAIS enables us to better identify areas where support is needed and to feed what we learn on the ground back into the IAIS's standard setting process. The A2ii works closely with its development partners leveraging off our comparative strengths.

05

Our achievements:

- We contributed to **8** supervisory papers of the IAIS, which provide supervisors with guidance on how to implement an inclusive regulatory and supervisory approaches.
- We conducted **20** country assessments, from Colombia to Ethiopia to the Philippines, which have set in motion regulatory changes in at least **15** countries.
- We have worked with local and global partners, insurance organisations and agencies to build the capacity of insurance supervisors and regulators. Today, there are **24** countries with inclusive regulatory framework, with **24** countries in the process of developing their frameworks, as compared to only **6** in 2009.
- As affiliated members of the Global Partnership for Financial Inclusion we have contributed to the work of the G20 on financial inclusion and raised the awareness of the need for insurance to be included in national financial strategies.
- As of 2014, we have been facilitating 6 consultation calls per year, followed up by reports in each language which are subsequently published on our website. Consultation calls are topic-focused webinars for insurance supervisors, conducted in English, French, and Spanish.

→ In 2019:

A2ii (co-) organised 17 events

We conducted 6 consultation calls

→ Our capacity building highlights

Capacity Building Strategy: from awareness raising to behavioural change

The first Inclusive Insurance Innovation Lab (iii-lab)

The second Inclusive Insurance Innovation Lab (iii-lab) selected participant countries:

Capacity Building for Insurance Supervisors-Leveraging Actuarial Skills

For 2019 on average **94%** of insurance supervisors believe that the A2ii events and technical materials help them to design regulations and supervisory systems that foster access to insurance.

98% of stakeholders believe the A2ii fulfils its mission.
